Art Unit: 1626

Receipt is acknowledged of the information disclosure statement filed September 18, 2006, which has been entered in the file.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1 to 12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification does not describe what is encompassed by "organic material" except foods, nutritional substances and pharmaceuticals. It is not clear what else is encompassed by this phrase.

To overcome this rejection, claim 1 should be amended to limit the organic material to foods, nutritional substances and pharmaceuticals.

Art Unit: 1626

Claims 13 to 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The references made of record and not relied upon show the state of the art.

The closest prior art is Example 2 of WO 02/072707 which describes the use of a dye of instant formula (1) to dye polyester material. Dyeing Example 2 of this reference describes the use of UV absorbers in addition to dyes to dye polyester.

No claim is allowed.
